**DISPENSING SYSTEM**

# PACK DISPENSING SYSTEM

## Trusted 「Dispense」 partner for the best of pouch/card handling process

### Achieving a unit environment with quick and precise operations

Since commercializing our Pouch Dispensing System (SDM Series) and moving into the food industry in 1971, we have been developing the pouch supply system to be faster, more streamlined, automated and more energy efficient. In the previous process of pouch supply, it was based on loading continuous pouches using Pouch Loader or winding continuous pouches using pouch winder. By using the pouch dispenser for the processed continuous pouches in the pouch supply process, we are contributing towards a more hygienic, efficient and automated production line.

## POUCH DISPENSER KD Series

- KD-810
- KD-910
- KD-1010
- KD-4000

KD-810

### Fast and precise pouch dispensing

The pouch dispenser is designed to cut continuous pouches (sachets) into singles in fixed size and deliver it to right position of packaging machine.

There are enriched options that can be chosen for different products:

Fix position dispensing unit deliver pouch to same position eventhe wrapping machine speed is changed.

Feed unit makes the heavy pouch dispensing available,

Vibrator unit makes the light and fine particle pouch's length detecting more precise.

#### < Object products >

Desiccant	Cofectionery/ seaweed/ delicacies/ food in general	V.F.F.S Packaging machine
Soup/ spice	Instant noudle	H.F.F.S Packaging machine
Syrup	Cofectionery	
Sauce/ mustard	Food in general	Cartoning machine
Spoon/ Fork		

## POUCH CUTTER KS Series

- KS-800
- KS-2100

KS-800

### Fast and precise pouch cutting

The Pouch Cutter is designed for notches and cuts the chain pouches (sachets) into singles in fix size. Perforation is an option available to be selected.

It can also be connected to the Pouch stocker for pouch alignment and loading system.

## POUCH LOADER KE Series

· KE-1000V · KE-890  
· KE-344

### Fast and precise pouch **Loading**

Pouch Loader is designed to load the continuous pouches (sachets) in desirable numbers, into carton box after receiving 3-side or 4-side seal pouches from packaging machine.

Using this loader in combination with Pouch Dispenser, the Pouch Feeding operation can save man power greatly.

**We also produce Special Pouch Loader for multiple tracks packaging machine.**

## POUCH STOCKER CS Series

CS-150W

· CS-150W

### Fast and precise pouch **Stocking**

Pouch stocker is designed, to connect the packing machine to deliver the single or multiple cut pouches (sachets) to a set-position, drops the pouches horizontally, aligns and loads them in to a box.

- The set-position insertion unit uses a rotating shutter with AC servomotor which makes it have **low acoustic noise and high speed stocking.**
- Stocking figures are configured at the counter, after counting up, new box can be supplied automatically, which makes it **easy to operate.**
- Safety covers are mounted for the pouch insertion unit, making its working **safer.**
- Machine space designed effectively makes it **more compact.**

## CARD DISPENSER CD Series

CD-810

· CD-810  
· CD-861  
· CD-910

### Fast and precise pouch **Dispensing**

Card dispenser is designed to insert all varieties of card, seal, board, tray, lids etc in set positions on the conveyor line. Our unique CAM RACK (patent) used as the driving mechanism, makes the operation more stable and smoother.

It is an easy to use, compact CARD DISPENSER designed with the aim of a smaller and lighter product.
