

PACK DISPENSING SYSTEM

POUCH STOCKER CS Series

CS-150W

· CS-150W

Fast and precise pouch **Stocking**

Pouch stoker is designed, to connect the packing machine to deliver the single or multiple cut pouches (sachets) to a set-position, drops the pouches horizontally, aligns and loads them in to a box.

- The set-position insertion unit uses a rotating shutter with AC servomotor which makes it have **low acoustic noise and high speed stocking**.
- Stocking figures are configured at the counter, after counting up, new box can be supplied automatically, which makes it **easy to operate**.
- Safety covers are mounted for the pouch insertion unit, making its working **safer**.
- Machine space designed effectively makes it **more compact**.

DISPENSING SYSTEM

PACK DISPENSING SYSTEM

Trusted 「Dispense」 partner for the best of pouch/card handling process

Achieving a unit environment with quick and precise operations

Since commercializing our Pouch Dispensing System (SDM Series) and moving into the food industry in 1971, we have been developing the pouch supply system to be faster, more streamlined, automated and more energy efficient. In the previous process of pouch supply, it was based on loading continuous pouches using Pouch Loader or winding continuous pouches using pouch winder. By using the pouch dispenser for the processed continuous pouches in the pouch supply process, we are contributing towards a more hygienic, efficient and automated production line.

POUCH DISPENSER KD Series

- KD-810
- KD-910
- KD-1010
- KD-4000

KD-810

Fast and precise pouch dispensing

The pouch dispenser is designed to cut continuous pouches (sachets) into singles in fixed size and deliver it to right position of packaging machine.

There are enriched options that can be chosen for different products:

Fix position dispensing unit deliver pouch to same position eventhe wrapping machine speed is changed.

Feed unit makes the heavy pouch dispensing available,

Vibrator unit makes the light and fine particle pouch's length detecting more precise.

< Object products >
